

- ① Local Storage
- persist even after I close my tab / browser window
- ② Session Storage
- it persists until browser is not closed
- Web Storage API
- key: value
 - name: namespace

LS sets data acc to origin

1) key: value → string arr, obj → store

2) tickets: $\begin{Bmatrix} [1, 2] \\ [3, 4] \end{Bmatrix} \rightarrow \begin{Bmatrix} [] \end{Bmatrix}$ → stringifying

str ~~str~~ = "[[1, 2], [3, 4]]"

JSON.stringify

JSON.parse(str)
